

US COMPON Survey

Introduction

We are asking you to take a short survey about your involvement in current climate change policy discussions in the United States. This project is funded by the National Science Foundation (BCS-0826892).

Please provide your contact information (it will be kept confidential in accordance with Columbia University Human Subjects Protocol--#IRB-AAAD2840)

Name:

Title:

* **Office Contact Information:**

Question 1

Below is a list of statements regarding the nature of global climate change as a phenomenon and as a policy issue. These issues are stated in a one-sided manner to allow for agreement or disagreement.

Please choose the option that best reflects the level of agreement/disagreement in your group's typical policy stance with the issue as stated (from Strongly Agree to Strongly Disagree).

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
Global climate change is currently occurring.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Human activities are an important driver of current global climate change.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The US should give priority to climate change above other issues (development, security, stability, competitiveness, etc).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The world should give priority to other issues (development, security, stability, competitiveness, etc) above climate change.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Is there anything else you would like to add about this topic?

Question 2

Next, we want to talk about the important national climate change issues that your group is facing. The table below states issues in a one-sided manner to allow for agreement/disagreement.

US COMPON Survey

Please choose the option that best reflects the typical policy stance of your group on the issue as stated (from Strongly Agree to Strongly Disagree).

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
The US should aim for more ambitious domestic action to increase emissions reductions.	jn	jn	jn	jn	jn
The US should take global leadership by boldly reducing its greenhouse gas emissions.	jn	jn	jn	jn	jn
The US emissions target for 2020 (17% below 2005 levels by 2020) is too ambitious.	jn	jn	jn	jn	jn
The best way to cut greenhouse gas emissions is through voluntary action by US industries.	jn	jn	jn	jn	jn
Emissions Trading (cap and trade) could make a significant contribution to reducing greenhouse gas emissions in the US.	jn	jn	jn	jn	jn
A Carbon Tax could make a significant contribution to reducing greenhouse gas emissions in the US.	jn	jn	jn	jn	jn
Carbon offsetting could make a significant contribution to reducing greenhouse gas emissions in the US.	jn	jn	jn	jn	jn
The US should expand nuclear power to cut greenhouse gas emissions.	jn	jn	jn	jn	jn
A low-carbon economy will be an economic boon for the US in the long run.	jn	jn	jn	jn	jn
A strong, binding international agreement is necessary for effective global reductions in greenhouse gas emissions.	jn	jn	jn	jn	jn
Strong commitments from China are necessary for an effective international agreement.	jn	jn	jn	jn	jn
The US should take strong action to reduce emissions regardless of other countries' actions.	jn	jn	jn	jn	jn
The US should commit more (international) funding to reduce greenhouse gas emissions.	jn	jn	jn	jn	jn

Question 3-1

Please indicate those policy actors that stand out as especially influential in current domestic climate change politics by putting a mark after the policy actors' names in the column.

Question 4

Name three key individuals related to climate change in the United States.

Please list them below.

1.
2.
3.

US COMPON Survey

Question 5

Below are climate-related proposals being discussed in the United States. These proposals may have been accepted and adopted recently, or they may still be under discussion.

Question 5-1: Please indicate your organization's position on the issue (as stated).

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
National Reduction of GHG emissions by 17% below 2005 levels by 2020	jn	jn	jn	jn	jn
Emissions trading (cap and trade) is the best option for reducing US GHG emissions.	jn	jn	jn	jn	jn
The US should provide subsidies for nuclear power as a form of GHG emissions reductions.	jn	jn	jn	jn	jn
The US should invest more money in clean coal technology.	jn	jn	jn	jn	jn
Countries should set their own targets for GHG emissions reductions.	jn	jn	jn	jn	jn

Question 5-2: Which of the following activities did your organization undertake to try to influence the outcome of each event? Please select all that apply for each debate/policy category.

	National Reduction Target	Emissions Trading	Nuclear	Position in UNFCCC Negotiations	Clean Coal Technology
Lobbying: Informal contacts with political parties, government officials to advocate for your position.	€	€	€	€	€
Policy-making: Formal testimony at hearings, participation on government advisory committee, draft legislation proposals or text	€	€	€	€	€
Technical analysis: Distribution of data analysis, policy analysis, research documents	€	€	€	€	€
Discussion forums: Exchange of ideas and preferences with other interested groups	€	€	€	€	€
Media and publicity: Press releases, press conferences, advertising to publicize your position	€	€	€	€	€
Activation: Collect signatures on petitions, call or send letters or emails to politicians or officials	€	€	€	€	€

Organizational Information

Question 7: How many people does your group employ?

Number of FTEs -- Full-Time Equivalents (two half-time staff equal one full-time staff, etc.)

Question 8: Is your group a membership organization?

Yes

No

If Yes, how many individuals or organizations are members?

US COMPON Survey

Question 9: Does your group have any staff members whose regular tasks involve monitoring the national political scene for all kinds of national policy issues of interest to it?

Yes

No

If Yes, how many staff members do this? (Number of FTEs)

Question 10: More specifically, how many full-time equivalent staff members monitor the national political scene for national climate change policy issues?

Number of FTEs

Question 11: Does your group have any staff members whose principal responsibility is to gather technical data relevant to national climate change policy issues?

Yes

No

If Yes, how many FTEs do this?

Question 12: Does your group employ any climate change scientists who can analyze weather data and create climate models?

Yes

No

If Yes, how many FTEs do this?

Question 13: Roughly what percentage of your group's budget comes from these sources?

Individual donations
(members, etc.) (%)

Sales of products (%)

Grants from foundations (%)

Business funding (%)

Government funding (%)

Other (%)
